

License Agreement

Software Products

END USER LICENSE AGREEMENT FOR WinMOD® Software

SOFTWARE PRODUCT LICENSE

1. DEFINITIONS

LICENSOR: WINMOD GmbH
Neuendorfstraße 23 B
16761 Hennigsdorf, GERMANY

SOFTWARE: "SOFTWARE" means the computer software under the WinMOD® trademark, related media, print material, application documentation, electronic instructions and all other publications related to the product. "SOFTWARE" also includes any updates and upgrades of the initial product.

COMPUTER: In this EULA, "COMPUTER" means a single "computer system."

INTENDED USE: The SOFTWARE is intended for simulations for testing purposes; the SOFTWARE creates a digital model of machines and (production) systems in the sense of virtual commissioning. The SOFTWARE is not intended for real use, i.e., use in real machines or (production) systems.

2. APPLICATION

2.1. This software license applies to WinMOD® system software, WinMOD® add-ons, WinMOD® configurations, WinMOD® SIMLINE and WinMOD® program libraries for companies, legal persons under public law and special funds under public law in the sense of Section 310 (1) of the German Civil Code [Bürgerliches Gesetzbuch, BGB].

2.2. Installation and configuration services are not the object of this EULA.

3. LICENSE GRANTING

Conditional on compliance with this EULA, the Licensor grants the Licensee the following rights:

3.1. 3.1 Rights granting

Upon complete payment of the purchase price, the Licensee will be granted the non-exclusive rights to, without temporal or spatial limitation, use the SOFTWARE to the extent specified by this EULA.

The SOFTWARE may be installed on any number of COMPUTERS, but may only be run on a single COMPUTER and by a natural person via a dongle. A dongle (USB stick with a dongle program) permitting agreed and licensed use of the SOFTWARE will be provided to the Licensee. Simultaneous use by the maximum number of natural persons corresponding to the number of licenses (dongles) acquired by the Licensee is permitted.

Permitted use especially includes installing, loading into memory and intended use by the Licensee of the SOFTWARE.

If the Licensee uses the SOFTWARE to an extent that exceeds the acquired usage rights qualitatively (concerning the type of permitted use) or quantitatively (concerning the number of acquired licenses), the Licensee must acquire the licenses necessary for permitted use without undue delay. If the Licensee fails to do so, the Licensor will exercise the rights to which the Licensor is entitled.

Copyright notices, serial numbers and other program identifiers may not be altered or removed from the SOFTWARE.

3.2. Transfers

A single license may not be shared or used on several COMPUTERS simultaneously. The SOFTWARE may only be used on a single COMPUTER as specified by this EULA.

The Licensee may permanently transfer his or her acquired copy of the SOFTWARE to third parties by handing over the license certificate and application documentation if the Licensee does not retain copies of the SOFTWARE. In this case, the Licensee must fully cease using the SOFTWARE, remove any installed copies of the SOFTWARE from his or her COMPUTERS and erase or hand over to the Licensor all other copies on other data carriers, unless longer storage is required by law. If requested by the Licensor, the Licensee must confirm the complete performance of the stated measures in writing or state the reasons for storing the SOFTWARE for a longer period. If the SOFTWARE is an update, every transfer must include every previous version of the SOFTWARE and dongles. Transfers may not be performed indirectly, e.g., on commission. The Licensee must expressly require compliance with the extent of the rights granting under this EULA from the third party. Furthermore, the Licensee must disclose to the Licensor the name and complete address of the end user to whom the software is provided.

3.3. Activation

The licensing rights granted by this EULA may only be exercised if the SOFTWARE is activated within 14 days of installation. The licensed copy must be activated as described in the setup sequence. If the SOFTWARE is not activated within 14 days, all parts of the SOFTWARE must be uninstalled and the backup copy must be destroyed. The original data carrier, all provided documentation and all accessories must be returned to the Licensor.

3.4. Backup copy

The Licensee may create a backup copy of the SOFTWARE if necessary for securing future use. The Licensee may only use the backup copy for archiving purposes and to re-install the SOFTWARE on the COMPUTER. The Licensee must clearly label the backup copy as a "backup copy" with the Licensor's copyright notice. Unless expressly permitted by this EULA or by law, the Licensee may not create other copies of the SOFTWARE or of print material included with the SOFTWARE.

License Agreement

Software Products

4. RIGHTS RESERVATION AND RETENTION OF TITLE

The Licensor reserves any rights not expressly granted to the Licensee by this EULA, especially copyrights and other industrial property rights for the SOFTWARE. The SOFTWARE is protected by copyright.

All data carriers and print material are subject to retention of title until the purchase price is fully paid.

5. REVERSE ENGINEERING, DECOMPILING AND DISASSEMBLING RESTRICTIONS

The Licensee may not reverse engineer, decompile or disassemble the SOFTWARE, unless permitted by law or expressly by the Licensor. However, the former only applies if the Licensor, within an appropriate period, does not provide the necessary information requested by the Licensee.

6. RENTING/COMMERCIAL HOSTING PROHIBITION

The Licensee may not rent out or otherwise sublicense, make publicly accessible or create wireless or wired reproductions of or provide the acquired SOFTWARE to third parties for a fee or free of charge (e.g., "software as a service"). However, this does not apply if a registered representative provides the SOFTWARE to a company in accordance with Section 3.2.

7. COMPONENT SEPARATION

The SOFTWARE is licensed as a uniform product. The Licensee may not separate the SOFTWARE's components for use on more than one COMPUTER.

8. TRADEMARKS

This EULA does not grant rights related to the Licensor's WinMOD® trademark to the Licensee.

9. PRODUCT SUPPORT

SOFTWARE support is provided by the Licensor. If you have questions about this EULA or would like to contact the Licensor for another reason, please use the address provided in the documentation.

10. LINKS TO PAGES OF THIRD-PARTY PROVIDERS

When using the SOFTWARE, the Licensee may access linked pages of third-party providers. Pages of third-party providers are not controlled by the Licensor. The Licensor is not responsible for the contents of, links on or changes or updates to pages of third-party providers.

11. ADDITIONAL SOFTWARE/SERVICES

This EULA also applies to additions, such as updates, add-on components, product support or components of Internet-based services of the SOFTWARE the Licensee may receive from the Licensor after the Licensee received the original copy of the SOFTWARE, unless the Licensee accepts the updated conditions or another agreement has priority. If additional components do not include other conditions and are provided to the Licensee by the Licensor, the Licensee will be granted a license from the Licensor in compliance with this EULA.

12. UPDATES

If the SOFTWARE is described as an update, the Licensee must have a corresponding license for a product the Licensor designated as suitable for the update ("suitable product") to use the SOFTWARE. SOFTWARE described as an update will replace and/or supplement (and, when updating the SOFTWARE, may disable) the

suitable product. After the update, the Licensee may no longer use the initial SOFTWARE (unless regulated otherwise). The Licensee may only use the resulting updated product in compliance with this EULA. If the SOFTWARE is an update for a component of a software program package the Licensee licensed as a uniform product, the SOFTWARE may only be used and transferred as part of this uniform product package and may not be separated for use on more than one COMPUTER.

13. SOFTWARE NOT INTENDED FOR RESALE

SOFTWARE specified as a "test license" may not be sold or otherwise transferred in exchange for an equivalent value or used for purposes other than demonstration, testing or evaluation.

14. EDUCATIONAL VERSIONS OF THE SOFTWARE (WINMOD-EDU)

To use SOFTWARE specified as an "educational version" or "EDU" (education), the Licensee must be an "authorized user of a recognized educational institution." Commercial use of the SOFTWARE is prohibited. In case of questions about such authorization, please contact the Licensor.

15. EXPORT RESTRICTIONS

The Licensee and the Licensor agree that the SOFTWARE may be subject to export and import restrictions. The Licensee must comply with all international and national laws applicable to the SOFTWARE. Exporting the SOFTWARE may require an export license. In such cases, the Licensee will be responsible for obtaining the necessary export license. The Licensor's performance is conditional on performance not being prevented by national or international export or import or other legal regulations.

16. LICENSE CERTIFICATE AND AUDIT RIGHTS

16.1. Licensed copies of the SOFTWARE are provided on an original dongle of the Licensor. The Licensee is only given the dongle to use the SOFTWARE as specified by the EULA, the license certificate and the user documentation.

16.2. If requested by the Licensor, the Licensee must enable the Licensor to confirm proper use of the SOFTWARE, especially concerning whether the Licensee qualitatively and quantitatively uses the SOFTWARE to the licensed extent.

17. TERMINATION

Other rights notwithstanding, the Licensor may terminate this EULA extraordinarily if the Licensee infringes on this EULA. In such cases, the Licensee must destroy any copies of the SOFTWARE and of its components and return the dongle to the Licensor.

18. ENTIRE AGREEMENT

This EULA (including all supplements and additional agreements for this EULA that are part of the SOFTWARE provision) represents the entire agreement between the Licensee and the Licensor concerning the SOFTWARE and (if available) support or other services. This EULA has priority over all previous or simultaneous oral or written notices, recommendations or assurances concerning the SOFTWARE and any other object of this EULA.

License Agreement

Software Products

19. GUARANTEE

- 19.1. Without undue delay upon receipt, the Licensee must inspect the SOFTWARE for obvious defects. Defects must be reported to the Licensor without undue delay.
- 19.2. If no defects are reported, the goods will be considered accepted, except in case of hidden defects that could not be detected during inspection. Hidden defects must be reported without undue delay upon discovery; otherwise, the goods will be considered approved despite their defects. However, these reporting obligations do not apply to defects fraudulently concealed by the Licensor.
- 19.3. Defects are not present if the Licensee causes the defect by manipulating or having a third party manipulate the SOFTWARE without authorization granted by the Licensor in writing or under the law or this EULA. Defects are also not present if the SOFTWARE is used on hardware or operating systems that do not meet the requirements specified in the offer upon conclusion of the agreement or by the product description.
- 19.4. In case of a defect, the Licensor may, at the Licensor's discretion, remedy the defect or replace the SOFTWARE. If the Licensor replaces the software, the Licensee may receive a later version of the SOFTWARE, unless this may cause unreasonable impairments. In case of legal defects, the Licensor will, at the Licensor's discretion, provide legally sound use of the SOFTWARE to the Licensee or adjust the SOFTWARE to prevent infringements on third-party rights. The Licensor may also fulfill its remedy obligations by providing updates with automatic installation to be downloaded from the Licensor's website or by offering telephone support to the Licensee to solve any installation problems.
- 19.5. Remedies will have failed in case of 3 unsuccessful attempts by the Licensor. Remedy failure will authorize the Licensee to withdraw from the agreement. However, withdrawal rights will not be established for insignificant defects. If the Licensor is at fault, the Licensee may exercise damage claims in accordance with Section 20.
- 19.6. Defect claims will expire after 1 year. If the SOFTWARE is sold on a data carrier, this limitation period will commence upon the delivery of the SOFTWARE to the Licensee; if the SOFTWARE is sold via Internet download, the limitation period will commence upon disclosing and registering the access data for the download area.
- 19.7. The Licensee may only invoke guarantee promises of the Licensor that have been confirmed in writing by the Licensor or by the Licensor's legal representative.
- 19.8. The SOFTWARE was developed as software for the INTENDED USE and is offered for this, not for special purposes of the user. The SOFTWARE's quality and functionality is specified by the application documentation. The specifications therein represent performance specifications, not guarantees.

20. LIABILITY LIMITATION

The SOFTWARE is provided to the Licensee exclusively for the INTENDED USE (Section 1). Use outside

of the INTENDED USE will be entirely at the risk of the Licensee and excludes liability of the Licensor, unless regulated otherwise hereafter. Irrespective of the legal reason, including unlawful action, damages and reimbursement of futile expenses are regulated as follows:

- 20.1. The Licensor will not be liable for simple negligence of its bodies, legal representatives, employees or other vicarious agents, except in case of violations of essential contractual obligations. Essential contractual obligations are the essential obligations on which the contract is based and on the basis of which the contract is concluded and on compliance with which the Licensee may rely.
- 20.2. If the Licensor is liable for damages under Section 20.3, this liability is limited to damages foreseeable by the Licensor as a possible consequence of a breach of contract or that are due to circumstances of which the Licensor was or should have been aware when practicing due diligence at the time of contract conclusion. In addition, compensation may only be provided for indirect and subsequent damage caused by SOFTWARE defects if such defects are typically to be expected when using the SOFTWARE as intended.
- 20.3. In case of liability for simple negligence, the Licensor's liability for material damage and resulting asset damage will be limited to EUR 300,000 per damage case (corresponding to the Licensor's respectively insured amount), even for violations of essential contractual obligations. Apart from that, liability for restoring the Licensee's data is limited to the costs necessary for restoring the data if the data is regularly secured in the manner specified by the Licensor or by the provider of third-party software or can otherwise be reconstructed from machine-readable data material with reasonable effort.
- 20.4. The above-stated liability exclusion and limitations apply equally to bodies, legal representatives, employees and other vicarious agents of the Licensor.
- 20.5. Any technical information or consultation by the Licensor that is not part of the contractually agreed service scope for providing the SOFTWARE is offered free of charge and under exclusion of any liability.
- 20.6. The above-stated limitations of Section 20 do not apply to the Licensor's liability for intent, guaranteed characteristics, injuries to life, limb or health or under the German Product Liability Act [Produkthaftungsgesetz, ProdHaftG].
- 20.7. The Licensee must ensure that the Licensee and the Licensee's employees possess the knowledge necessary for the proper installation and use of the SOFTWARE for its INTENDED USE. The Licensor will not be liable for problems or defects caused by inadequate knowledge of the SOFTWARE's users.

21. APPLICABLE LAW / PLACE OF JURISDICTION / SEVERABILITY CLAUSE

- 21.1. To be effective, changes to this EULA must be issued in written form. The same applies to any changes to this written form requirement.
- 21.2. The law of the Federal Republic of Germany applies, excluding the United Nations Convention on Contracts

License Agreement

Software Products

for the International Sale of Goods of 11 April 1980.

- 21.3. Insofar as legally permissible, the place of jurisdiction is the registered office of the Licensor. However, the Licensor may also sue at the competent court of the Licensee or at any other court that may be competent at the place of fulfillment of the obligation.
- 21.4. The invalidity of individual regulations of this EULA will not affect the validity of the remaining regulations. In such cases, the Parties must conclude a valid regulation that most closely approximates the intended aim of the invalid regulation economically. The same applies to closing any regulatory gaps in this EULA.

Hennigsdorf July 2018
